

STONY PLAIN SUN.

VOLUME ELEVEN.

STONY PLAIN, ALBERTA, THURSDAY, MAY 28, 1931.

Whole Number 557

Here and There

Annual value of forest products in Canada is placed around \$500,000,000 by the Canadian Government Forestry Service, and over 200,000 persons are employed in this work.

Total value of crude bullion gold in Ontario for the first two months of 1931 is placed at \$5,217,284 as compared with \$5,352,395 for the same period of 1930, an increase of nearly 23%. If this continues, all previous records of gold output are likely to be exceeded this year.

Position of president of the Boy Scouts Association of Canada has been offered to and accepted by E. W. Beatty, chairman and president of the Canadian Pacific Railway, whose interest in boy welfare has long been recognized all over the Dominion.

John Minard, section hand with the Canadian Pacific Railway for many years and pensioned at the age of 73, celebrated his 16th birthday April 2. He does not use glasses, eats well, sleeps well and enjoys life. He has no prescriptions for exceeding the century mark.

Sponsored by the Alberta Motorcycle Association, the Western Canada Motorcycle hill-climbing championships will be decided at Banff in the Canadian Rockies on May 24 and will be followed the same day by the Banff annual regatta.

A shipment of 800,000 salmon eggs has recently been forwarded to the Dominion Fish Hatchery at Flat Lake, Saskatchewan, to receive treatment prior to being deposited in the Nipisiguit River as a part of the 1931 programme for restocking New Brunswick fishing waters.

Canadians, from coast to coast, heard the voices of His Excellency the Governor-General and Rt. Hon. R. B. Bennett, prime Minister of the Dominion, May 13, in celebration of the work of the Canadian Red Cross through stations linked by the radio broadcast transmission system of the Canadian Pacific Railway Company's Telegraphs.

In the last analysis the railroad safety movement's success is traceable largely to teamwork. Each railroad worker is constantly reminded that safety is paramount. Safety practices have become habitual, therefore they do not lessen efficiency. Railroad passenger service is now more efficient as well as safer than ever before, says a prominent United States newspaper.

The new 6 1/2 hour service between Montreal and Toronto, both ways, which came into operation on Canadian Pacific lines end of April, has proved highly popular with travellers, and heavy traffic on these trains is reported. Ottawa has also been brought half an hour closer to Montreal and passengers for Quebec have had 16 minutes clipped from the time of the journey.

Popularity of the reduced weekend fares which went into effect May 1 on all Canadian Pacific lines was assured from the start, according to reports from traffic officials of the railways. They represent a saving of approximately 25% to the travelling public with reduced fares available from noon Friday to noon Sunday and return periods up to midnight of the Monday following. (740)

New Golf Club Organized.

The membership committee of the proposed golf club secured the required quota to form the club, and another meeting was held, at which Mr F W Yeats was elected president.

The town's Fair grounds were secured, and work was at once commenced on laying the greens for the six-hole course.

An Essay on Golf.

(By Ian Macdonald-Pittsford.)

Golf is a form of work made expensive enough for a man to enjoy it. It is physical and mental exertion made attractive by the fact that you have to dress for it in comic-opera clothes.

Golf is what letter-carrying, ditch-digging and carpet beating would be if those three tasks had to be performed on the same afternoon in short pants and colored socks by gouty-looking gentlemen who require a different implement for every mood.

Golf is the simplest looking game in the world when you decide to take it up, and the toughest after you have been at it ten or twelve years. It is probably the only known game a man can play as long as a quarter of a century and then discover that it was too deep for him in the first place.

The game is played on carefully selected grass with little white balls and as many clubs as the player can afford. The little balls cost from 75c to \$2, and it is possible to support a family of twelve people (all adults) for five months on the money represented by the balls lost by some golfers in a single afternoon.

A golf course has 18 holes, 17 of which are unnecessary and put in to make the game harder. A "hole" is a tin cup in the centre of a "green." A "green" is a small patch of grass costing \$108 a blade and usually located between a brook and a couple of apple trees, or a lot of "unfinished excavation."

The idea is to get the golf ball into each of the eighteen cups in the fewest strokes and the greatest number of words.

The ball must not be thrown, pushed or carried. It must be propelled by about \$200 worth of curious looking implements especially designed to provoke the owner.

Each implement has a specific purpose, and ultimately some golfers get to know what that purpose is: they are the exceptions.

After each hole has been completed the golfer counts his strokes. Then he subtracts six and says "Made that in five. That's one above par. Let us play for six next hole, too, Ed."

After the final, or 18th hole, the golfer adds up his score and stops when he has reached 87.

He then has a swim, a pint of gin, sings "Sweet Adeline" with 6 or 7 other liars, and calls it the end of a perfect day.

John Bauer's House Burned.

Mr John Bauer, the prominent dairy farmer north of town, had the misfortune to have his residence burn down on the afternoon of Friday, May 22. Smoke was first noticed coming from the kitchen roof, and the fire is supposed to have been caused by a defective flue.

As the structure stood on a knoll, the fire was noticed by some of the neighbors who happened to be working in the nearby fields, and these rushed to Mr Bauer's assistance, and helped materially in saving the adjoining building, despite the strong west wind blowing.

All hands were working in the field or in the dairy buildings when the blaze started, so very little of the contents of the house were saved.

Included in the loss is some \$125 in cash which Mr Bauer intended using in making a payment in the City the following day; and \$30 in cash belonging to an organization for which Mr Bauer is treasurer.

There was an insurance policy for \$800 on the building, and another for \$500 on the contents. The latter policy being put on this spring.

It is the intention of neighbors and others in the district, when Mr Bauer gets his lumber, to hold a "bowl" and put up the new house by each giving a day's work.

Address by Dr. Brown.

On a recent Friday Dr. G. H. Brown, dentist, who practices in Stony Plain every Friday, delivered a half hour address to the pupils at the local high school on the "Care of the Teeth." Under the heading Deciduous (temporary) and permanent teeth, the Doctor stressed the importance of caring for and retaining the temporary teeth the proper period of time, as they serve as guides to the permanent ones. The early loss of temporary teeth results in irregular permanent ones, which are more susceptible to decay and pyorrhea. All defects of the teeth should be corrected early.

To build and maintain strong, healthy teeth and jaws, the child must have proper food, exercise and sunshine; and the teeth and gums must be brushed regularly.

Under the heading of Diet, Dr. Brown stressed the importance of milk, green vegetables, whole wheat bread and fruits as a basis or principal part of the diet, with a minimum of other foods.

Vigorous exercise of the jaws and teeth is essential to their growth and health. Let your exercise and play be in the sunshine, which is our greatest preventive of disease. The lecturer dwelt on the importance of brushing the gums and teeth after meals and before going to bed. He advised the use of a dry, stiff tooth brush with paste used vigorously and brushing lengthwise of the teeth.

Dr. Brown considers the chewing of gum healthy, in that it exercises the jaw and teeth, and cleans to a certain extent.

The West's Bessetting Sin

If there is one besetting sin indulged in by the people of Western Canada it is the sin of impatience. Living in a new country, where thirty fifty years ago was given over to roving bands of Indians and immense herds of buffalo, our people today, expect and demand all those services and conveniences which it has taken centuries to build up and develop in older lands. It is a good fault to want the best there is in life for our children; it is a laudable ambition to work to secure such things; a proper spirit of discontent is all right, provided it is a proper spirit.

But in a vast extent of territory where population is as yet but thinly spread, where the element of time has not yet permitted that degree of productive development which leads to the accumulation of certain reserves of wealth, for people to expect to enjoy all those things which it is possible for older countries of large populations and centuries of accumulations to provide for their people, is not reasonable. Whatever we have must be paid for, and if in the West we have not sufficient people nor sufficient wealth to pay for what we want, we must of necessity go without until such time as we are able to provide them. And to be discontented with our lot in the meantime is neither reasonable nor right.

For example, Good, all-weather highways to serve all parts of Western Canada is the desire of everybody; it is a laudable desire. Efforts to realize it are being put forth, but people are impatient, and demand still larger programmes of construction, notwithstanding the fact that it is taxing their resources to the utmost to pay interest charges on past construction and finance the carrying out of existing programmes of new construction.

There is nothing to be gained, and much to be lost by having the whole country criss-crossed with good roads, provided with telephone and electric power services, equipped with churches, schools and hospitals, and other services and conveniences now so generally regarded as necessities, if as a result of providing them the burden of taxation is so heavy as to drive the people off their land. All these things are worse than valueless if the people cannot maintain an existence to enjoy them.

To cite another example. Within the past two years there has been erected and equipped, in the Province of Saskatchewan, three technical schools, one at Regina, a second at Moose Jaw, less than 50 miles distant, and a third at Saskatoon, 150 miles away, each of which has cost half a million dollars, or a total of \$1,500,000. This large expenditure for purely technical education has been made in a Province where over 70 per cent of the population lives in rural communities, and where constant stress is laid on the importance of educating the youth to remain on the land.

The point is not that technical schools are not good and desirable things. No, the point is, are we not aiming to provide these good things before we can afford to do so, and, to the extent that we mortgage our future in this way, are we not crippling our own efforts to provide and maintain something else much more essential and which would benefit a much larger percentage of all the people who have to bear the taxation burden? Are we not trying to ape other and older lands in our impatience to have everything they have, which no doubt they can afford now after long decades of growth, but which we cannot afford because we are not numerous and wealthy enough to carry the resultant financial burden.

Few men and fewer women there are but would like to live in a better house than they now occupy. If they could afford it, but knowing they cannot afford it, they make the best of what they have. Many of them could have the finer house of their dreams if they were prepared to mortgage their whole future for it and, while living in it, depleted themselves of other things and lived in a state of worry over the payments to be made.

The country is just an aggregation of individuals. They can have those things they are impatient to possess largely because other countries have them, but if in their impatience, and unwillingness to wait until they occupy much the same position as those others who can afford these things, they plunge ahead and get them, then they must not be impatient of the taxes they are called upon to pay, nor resentful if, being unable to pay, they lose all they had accumulated in years gone by.

It is in times like these that heed should be given to such matters. The present is hard for most people, and in no small degree because of the mistakes of past, made individually and collectively. This present depression will pass; good times will come again. We must willy-nilly be patient now. But will the old impatience come back with renewed force? Will we as a people still insist on running before we really are able to walk? If so, we will stumble again and fall once more.

Receives Medal

Wing Commander Charles Kingsford-Smith was awarded the Oswald Watt medal for the most conspicuous feat performed in 1930 by Australian-born fliers. The Australian Aero Club selected him for his flight from Dublin to Harbor Grace, Newfoundland, last June.

Protection For Miners

Safety caps and safety shoes are soon to be added to safety lamps as standard equipment in the Cape Breton collieries. The caps are of metal and are designed to protect the head from frequent bumps. The shoes will protect the feet from falling stones.

Was Weak and Run Down Could Scarcely Do Housework

Mrs. Edward A. Allen, Bensonton Alta., writes:—"I would like to tell you of the great benefit I have received from your Milburn's Heart and Nerve Pills. I was feeling very much run down in health, and was so weak I could scarcely do my housework, in fact, I would have to lie down in the afternoon for an hour or so. I saw your Pills in the drug store and took a box home with me, and I was delighted with my renewed strength. I have recommended them to a neighbor and feel sure they will help her too."

Price 50c a box

Sold by all drug and general stores, or mailed direct on receipt of price by The M. Milburn Co. Ltd., Toronto, Ont.

Unusual Cafe In London

Automatic Machines Will Serve Meals

In Record Time
Five-minute meals will be the order of the day when London's latest speed restaurant is opened in the Strand.

No dish will cost more than sixpence, and all foods will be served through automatic machines. Soiled plates will be slipped into letter-box-like slots, and there is an ingenious arrangement by which customers can wash and sterilize their own glasses.

"Soft" drinks, supplied through automatic machines, may be aerated, if desired.

Customers simply slip their still drinks into a little machine, press a button, and the "still drink becomes "sparkling."

Because of regulations alcoholic beverages cannot be supplied through an automatic machine, and a barman has been employed to look after this department. Here, also, the highest price will be charged.

The restaurant is to be open day and night, week days and Sundays.

SAVED IMPORTED DRESS

"After a little wearing, a lovely green voile—an important dress—lost color so completely that it was not wearable. A friend who had admired it asked me why I wasn't wearing it any more. On hearing the reason, she advised dyeing it and recommended Diamond Dyes. To make a long story short, it turned out beautifully. I have a lovely new dress that really cost just 15c—the price of one package of Diamond Dyes."

"I have since used Diamond Dyes for both tinting and dyeing. They do either equally well. I am not an expert dyer but I never have a failure with Diamond Dyes. They seem to be made so they always go on smoothly and evenly. They never spot, streak or run; and friends never know the things I dye with Diamond Dyes are redyed at all."

Mrs. R. F., Quebec.

Recipes For This Week

(By Betty Barclay)

GOLDEN COCONUT SHORTCAKE

8 thin slices sponge cake.

Orange sauce.

3 oranges, sections free from membrane.

½ cup coconut, southern style.

Allow two slices sponge cake for each serving. Place first slice of sponge cake on plate, cover with orange sauce, orange sections, coconut and additional orange sauce. Cover with second piece of sponge cake and top with orange sauce and orange slices. Sprinkle with coconut. Garnish with whipped cream around base if desired. Serves 4.

STRAWBERRY WHIP

1 package strawberry - flavored gelatine.

1 cup boiling water.

1 cup strawberry juice.

1 cup strawberries, crushed and drained.

½ cup sugar.

Dissolve gelatine in boiling water. Add strawberry juice. Chill. When slightly thickened, beat with rotary egg beater until of consistency of whipped cream. Fold in strawberries and sugar. Turn into mold. Chill until firm. Unmold. Serves 8.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

World's Smallest Dog

The world's smallest dog is said to have been acquired by the Marlborough Museum. It is a dwarf brown and white pointer, and although it lived for three years it never grew longer than six and half inches from nose to tail tip. Its head was one and a quarter inches long and an inch broad, and his hind legs were slightly less than two inches long.

Someone has succeeded in carving 100 words on a grain of rice. We are in hopes it includes directions as to how to cook it. So few people can cook rice.

W. N. U. 1891

Serious Rectal Troubles Often Caused By Harsh Cathartics

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

**ENO'S
"FRUIT SALT"**

Rubber Lining Protects Steel

Perfected Surface Resists Abrasion Under Most Severe Conditions

When chemists discovered a method for attaching a rubber lining to a metal surface, they presented a new and valuable material to the chemical engineer for use in the vats, tanks, pipes, pumps, and so forth, in which he handles corrosive liquids. The rubber lining effectively resists the action of acids which would soon eat through the steel. Now this process of attaching a rubber surface to metal has been perfected to a degree which encourages its use to resist abrasion in some of the most severe service conditions imaginable.—Popular Science.

An Odd Electrocution

Physicians at Fergus Falls, Minnesota, said that Wilbur Thompson, 30, highway workman, was killed by an electric shock, although his body did not come in contact with any electricity. Thompson was driving a grading machine beneath a heavily charged power wire on a highway near here. The current jumped from the wire to the metal button on Thompson's cap and electrified him.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonical in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

One reason why the scenery seems more wonderful in Europe is because you don't have to read it.

Canada Should Have

Right To Amend Constitution

Conference With Provinces May Be Called To Discuss This Matter

A resolution declaring that Canada should have the right to amend her own constitution, moved in the House of Commons, brought from Hon. Hugh Guthrie, Minister of Justice, the statement that he favored a conference with the provinces on this important matter. Before calling a conference, however, he thought that a committee of parliament should be appointed to consider this question.

"I am by no means hopeless of the situation," Mr. Guthrie declared to the House. "I am entirely hopeful, and I think it would be well for this parliament, if not at this session, at some subsequent session, to appoint a committee especially charged with the consideration of this question. We must prepare our case here before we call a conference, and it is a case that will require a great deal of preparation."

"After preparation had been made," added Mr. Guthrie, "I shall heartily favor the summoning of a provincial conference with the Dominion authorities to see what plan can be worked out so that in the future this parliament may be able to make the necessary amendments to our constitution."

Well-Protected Animal Park

Elk Island National Park in Alberta, which contains one of the Government buffalo herds, is entirely surrounded by thirty-four miles of nine-strand buffalo-proof wire fence; fireguards, sixteen feet in width, are ploughed about the park, both immediately inside and outside the fences.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Wax Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Imagination Cannot Grasp The Progress The World May Make In The Vista Of Future Years

To those who sometimes express the wish that they might return to life one hundred years hence to see what the world looks like, the prophecy of Sir James Jeans that it will last for about one million million years makes their wish seem a very trivial thing.

It is only twelve thousand years since mankind was living in the stone age. It was only after the advent of the steam age in the early part of last century that scientific progress began to make any headway. Today, steam has very largely been displaced by electricity. And electricity itself is only in its infancy. Scientists do not even know what it is. Tomorrow, electricity may be a back number. When man harnesses the atom—and he is trying hard every day—the world may be completely revolutionized. A single atom may drive the new Cunard liner across the Atlantic in a few hours. Human beings may be projected in steel cases from here to Australia. All present day machinery may be as obsolete as the implements of primitive human beings.

Millions of years before the Jeans' prophecy is put to the test inhabitants of Earth may take trips to Mars and other planets, and vice versa. When we get there the Martians may have something to show us that we do not dream of. Perhaps they will discover these secrets before we do and surprise us by dropping in on us one day.

It all staggers imagination. Those who believe in reincarnation must rejoice at the prospects.

Investigate Radium

Royal Inquiry Into Use Of Radium Treatment Will Be Held In Ontario

The appointment of Canon H. J. Cody, of Toronto, to head a royal inquiry, by the province of Ontario, into the use of radium as a treatment for cancer, was announced by Premier George S. Henry. As associates on the commission, he will have Professor J. C. McLennan, of the University of Toronto; Dr. W. T. Connell, of Queen's University, Kingston; Arthur Ford, managing editor of the London Free Press; and Hon. Dr. J. M. Robb, provincial minister of health.

Many Orders For Bees

Over Thousand Applications For Packages Received From Saskatchewan

Considerable expansion of the bee-keeping industry in Saskatchewan is indicated by the orders received for packages of bees, according to R. M. Pugh, Provincial Apiarist. To date, 1,041 applications or orders have been received as compared with 600 at the corresponding date, last year. In predicting that importations would be at least 50 per cent. greater than last year, Mr. Pugh stated that a considerable proportion of the applications had been received from new beekeepers.

Contrary To Opinion

Men are more inquisitive than women a Memphis newspaper editor found after queries to his information bureau had been totaled, and it was found that of the 205 questions asked, 125 were from men, and the remainder from women.

"Edo, come down, it is five o'clock!" "I don't care. I am working over-time today!"—Die Muskete, Vienna.

W. N. U. 1991

Times Have Been Harder

Only Thirty Years Ago and What a Difference

We still meet the party who exclaims: "These are tough times!" Tough times? Well, well! We read a reminiscence from 1900, the heyday of the bicycle, which notes that there was then in the country a bicycle to every seventy people. And in 1931 we are nearly at a figure of one automobile for every four people!

Horses? Umph, horses! In 1900, the census reported 25,000,000 horses and mules in the land, worth about \$100 each. Our present 25,000,000 registered automobiles are stated to be worth anyhow an average of \$350 each. And, take it or leave it—for so the 1930 U.S. statistical abstract declares—the country still possesses 19,000,000 horses and mules! Tough times? What about roads. No need of figures. As we know roads today there were none in 1900—absolutely none, except railroads. The country had who in 1900 returned home from a trip to Detroit had an audience for a month to hear talk about it. Now, it isn't so tremendous to his home folks if a fly to New York and back! To work up a name as a traveller, go around the world at least twice!—Detroit News.

Would Encourage Use Of Canadian Barley

To Replace Foreign Grain Corn In Livestock Feed

Steps taken to encourage use of Canadian barley in livestock feeding were described by Hon. Robert Weir, Minister of Agriculture, when the resolution of the Saskatchewan Board of Trade was referred to him. The resolution asks the government to insure the use of Canadian grown barley rather than foreign grown corn in livestock feeding.

Last fall, after tests had been conducted, the department here sent out letters showing how barley could be advantageously used for feeding both poultry and livestock. The tests proved barley to be very suitable as compared with corn.

One of the disadvantages has been that the 7,000,000 or 8,000,000 bushels of barley stored at the Head of the Lakes contained considerable other seeds including weed seeds. The farmers feeding livestock in the eastern part of Canada objected to this because of the danger of the weeds being spread on their own farms.

Record Butterfat Test

High-Producing Jersey Cow Owned By Alberta Man

What is believed to be a record butterfat test for a cow of any age or breed is claimed by Norman S. Clarke of Disbury, for the three-year-old Jersey cow "Waikiki Zenia's Fanny," which, in official R.O.P. test for the past 90 days, made a test of 9.8 per cent.

This high-producing cow is one of the choice animals purchased last year by Mr. Clarke in the state of Washington, and added to his herd at Disbury. The butter content of the milk, which is exceptionally high for even a cow of this breed, is certified by F. King of the Dominion Government cow-testing staff.

At the rate, the Clarke cow, in her average flow of two gallons of milk per day, produces sufficient butterfat to make approximately 2½ pounds of butter.

Overseas Air Route

Negotiations are still proceeding between Imperial Airways and Canadian aviation concerns with a view to establishing a regular service with giant flying boats between England and Canada, according to the air correspondent of the London Daily Herald. Experts have already collected full details regarding meteorological conditions, the newspaper declares.

According to census figures just released, Java has 821 people per square mile.

Counterfeiting of coins was an underworld "racket" in provinces of the Roman Empire.

Hog Market Is Bright

Optimistic View Is Taken Of Situation For Present Year

The eleventh annual live stock market and meat trade review of the Dominion Live Stock Branch takes an optimistic view of the hog market for the current year.

With regard to 1930, the review observes, "hogs claimed most of the limelight during the year and, all things considered, gave a star performance." The revenue from hogs was much smaller than the previous year because the volume of output was much lighter.

With respect to the prospects for 1931, it states "the increase in production which is pending should be in the interests of the industry, providing of course that the strictest care is taken to breed to the recognized bacon type and to feed and finish properly."

During the calendar year 1930, a total of 904,430 pigs were sold on Canadian stock yards. Winnipeg heads the list with a total sales of 242,003 hogs.

During the past year a higher percentage of hogs marketed qualified for the "select bacon" premium than at any time during the past five years.

Will Move Beaver

Owing To Water Shortage In British Columbia, Beaver Will Be Relocated

The wholesale destruction of Beaver has created a serious shortage of water in some parts of the interior of British Columbia, according to reports received by the government. To repair this damage and make sure that more beaver dams are built to maintain water supplies, the government will trap large numbers of beaver in the Bowron Lake country, east of Barkerville, next fall and turn them loose in the Cariboo country, where they are extremely scarce.

British Columbia Has Reforestation Plan

Is Planting Young Fir Trees On Reserved Land

Fifteen thousand two-year-old fir trees were planted recently on logged off land situated on the old International timber claims near Campbell River, a thousand acres of which were reserved some time ago by the Provincial Government for reforestation purposes. The trees are from the Government's green timber nursery at Vancouver, and are being systematically planted according to plans which have been formulated for some years.

WELL-KNOWN SUMMER RESORTS

It is said that Canadians are in the minority when it comes to knowing their own playgrounds. Be this as it may, figures reveal that the number of persons entering Canada for vacation purposes shows an annual increase. Canada has much to offer to the tourist in the way of resorts, and Jasper National Park, and Minkai in the Lake of the Woods region, are among those internationally well-known for holiday seekers. The Canadian National Railways maintain high class hotels at these resorts—Jasper Park Lodge, open June 1st to September 30th, and Minkai Lodge, from June 26th to September 15th. The top scene is a view of Minkai Lodge; the bottom is a row of bungalows at Jasper.

Valuable Contributions Made To The World By The Dominion In Comparatively Recent Times

Butter Output In Saskatchewan Higher

Ninety-Three Per Cent. Increase Over April Last Year

Production of creamy butter in Saskatchewan, during April, showed a 93 per cent. increase over the output for the corresponding month of 1930, and boosted the percentage increase for the year to date, to 81.3 per cent.

During April, 1931, production recorded in the dairy branch of the Saskatchewan Department of Agriculture, reached a total of 1,362,176 pounds, as compared with 706,538 pounds in April, 1930, an increase of 659,838 pounds, or 93.1 per cent.

The increase was most marked in the northern section of the province where the recorded gain was 128.1 per cent. over the April, 1930, figures. In the central section, the increase was 90 per cent., and in the southern, 80 per cent.

From January 1 to April 30, 1931, the output aggregated 4,381,804 pounds as compared with 2,393,892 pounds for the corresponding period of last year, the gain of 1,987,912 pounds representing a percentage increase of 83.3.

Use Of Combines

Big Saving Effected In Combine Method Of Harvesting Grain

According to the annual report of the Director of the Dominion Experimental Farms there were 85,000 tractors in Western Canada in 1929. The report adds: "The introduction of the combine method of harvesting grain has also reduced the time required and the cost of harvesting grain. Starting from one machine which was introduced and experimented with on the Dominion Experimental Station at Swift Current, Sask., in 1922, there are now located in the three provinces a total of 7,726 combines. These savings in labor have reduced the cost of growing crops. The use of the combine alone, as compared to the binder and thrasher method, has effected a saving of approximately 9 cents per bushel on a 20-bushel crop."

In order to avoid cutting down a grove of cottonwood trees, a new railway line being built in Texas is making a detour from its original survey.

A compilation has been made by a Canadian newspaper of some of the contributions to world progress made by the Dominion in comparatively recent years and the following are noted:

Canada built and demonstrated the first railway sleeping cars. Built and sent the first steamboat across the Atlantic.

Gave to the world the idea of the all-electric radio. Originated the idea of making paper from pulpwood.

First isolated helium gas in commercial quantities.

Originated the idea of the panoramic camera. Originated the idea of electric heating.

Built the world's first electric stove. Originated Marquis and other more recent wheat, which helped to build up the commerce of the West, both in Canada and the United States.

The idea of the telephone originated in Canada, and the first long-distance trials of the instrument were made in Ontario between Paris, Ont., and Brantford.

Canada pioneered in the field of electro-chemistry with the discovery of calcium carbide by Tom Wilson, of Hamilton.

Canada originated the idea of standard time, which has since been adopted by every civilized country in the world.

Canada built and demonstrated the first submarine telegraph in the history of the world.

A Canadian physician, Mr. F. O. Banting, of Toronto, discovered insulin, a serum for the treatment of diabetes.

Canada built and demonstrated the first compound steam engine in the history of the world. The effect of this invention was the doom of the sailing ship as a factor in ocean commerce.

Tuberculosis Tests

Saskatchewan Occupies Envious Position, Reactor Tests Show

Second only to Prince Edward Island in the health of its cattle from the standpoint of tuberculosis, Saskatchewan occupies an enviable position, recent reactor tests being conducted show.

Out of 13,65 head of cattle recently tested in the five municipalities of Indian Head, 156; South Qu'Appelle, 157; Edenwold, 158; Sherwood, 159; and Lumsden, 180, only 164 reactors were reported, or 1.2 per cent. of the total.

Reactors to the test in the various provinces of the Dominion range from 4 per cent. to nine per cent.

The testing work is being carried out by the Department of Agriculture working in conjunction with the Dominion Department. The veterinarians are supplied by the health of animals branch, Ottawa, and Dr. M. Parker, chief inspector is in charge of the work.

Ancient City Of Ur

Discovery of a tablet which is said to provide the first evidence that the ancient city of Ur of the Chaldees was inhabited as late as 324 B.C., in the reign of Alexander the Great, was announced by Horace H. F. Jayne, director of the University of Pennsylvania Museum.

WORLD HAPPENINGS BRIEFLY TOLD

Insurance indemnities are not liable to income tax, the Supreme Court of Canada has ruled.

Gold reserves of the world will be used in the future for international banking, Sir Thomas White predicts.

The Graf Zeppelin is being groomed to make six trans-Atlantic trips this summer, Martin Wronsky said.

The government does not intend making any changes to the Canada Grain Act in the present session, Hon. H. H. Stevens declared.

Cariboo, centre of Canada's great gold rush, has gold to the value of \$300,000,000 if it could be worked commercially and scientifically.

One of the paintings of Mrs. Melita Aitken, of Victoria, B.C., has been hung by the Royal Academy, London, England.

Termed too radical in character, the Senate defeated a bill which would have compelled citizens of Canada to carry an identification card bearing their photographs.

The women of the Dominion will present a huge petition to the League of Nations urging reduction in the manufacture of the instruments of warfare.

Canada sold to China 184,000 tons of wheat during the past year, while Australia sold 400,000 tons, according to figures given by Hon. H. H. Stevens.

Chief Buffalo Child Long Lance, Blackfoot Indian, of Calgary, Alta., has received a commercial pilot's license. He expects to engage in fur trading by air in the North West Territories.

It Hits Pain Begone—When neuralgia racks the nerves or lumbago cripples the back in the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

Silver Wires For Violin Bows

German Stores New Material Gives
More Brilliant Tone

Violin bows, which have been strung with horsehair ever since the Middle Ages at least, may soon have to yield place to a new form of an old material. A German violinist has been experimenting with bows strung with silver wires of hair-like fineness, slightly roughened on their surfaces to set the violin strings vibrating. It is stated that a sensitiveness and brilliance of tone are achieved that exceed the effects usually obtained with the old horsehair.—Popular Science.

The Loser's Move

In a newspaper appeared the following advertisement: "The man who picked up my wallet in Fore Street was recognized. He is requested to return it." The next day this reply was published: "The recognized man, who picked up your wallet requests the loser to call at any time and collect it."

TO KEEP THE Children Healthy

When they're "off colour" give them Dr. Carter's Little Liver Pills. Safe, acting gently on the bowels and liver, they soon bring back smiles and high spirits that healthy youngsters should show.

Airways Line Absorbed

Reported Change In Services Operating In Northern Alberta

Announcement was made at Montreal that Canadian Airways Limited, had absorbed Commercial Airways of Edmonton, Limited, which inaugurated on December 10, 1929, a regular air mail service between Fort McMurray, Alberta, and Athabasca, North West Territories, at the mouth of the Mackenzie River.

In making the announcement G. C. Drury, secretary-treasurer of Canadian Airways, said the assets and liabilities of Commercial Airways were not being taken over, but that by arrangement with the government its air mail contract had been assured by the Canadian Airways, which had purchased five of the company's smaller aeroplanes.

Capt. R. W. (Wop) May, outstanding western pilot, will now fly for Canadian Airways. It is announced.

Have Completed Trials

Canada's Two New Destroyers Will Soon Be In Commission

Canada's two new destroyers, the "Skeena" and "Saguenay," have completed their power trials.

The "Saguenay," destined for service on the eastern seaboard, will leave Portsmouth for Canada during June under Commander Percy Nelles. The "Skeena," named after the river in British Columbia, is destined for service on the Pacific Coast, and will leave Portsmouth for the Pacific about 10 days after the "Saguenay," under Commander V. G. Brodeur.

The new destroyers will replace the "Champlain" and "Vancouver," loaned to Canada by the Royal Navy during the construction of the new vessels.

Second Hundred Years Hardest

That the second hundred years are the hardest is the opinion of Miss Ann Stansall of Mansfield, England, when she celebrated her 101st birthday recently. She said that since she had passed the century mark she had been attended for the first time by a doctor, had taken her first dose of medicine and had put the washing out for the first time. Then she took her first vacation trip.

For treatment of caked bags in cows, or garget, use Douglas' Egyptian Liniment. The quick, sure remedy. Saves time and expense. Prevents blemished stock.

A machine has been invented to slice loaves of bread as they leave the ovens in large bakeries, the slices being sealed in waxed paper packages for sale. This is said to save the waste of stale bread.

Better Fire Protection Needed

More Organized System For Rural Districts Is Stressed

A more organized system of fire protection in rural districts was urged recently by David J. Price, of Washington, D.C., chief engineer of the Bureau of Chemistry and Soils, U.S. Department of Agriculture, addressing the annual convention of the National Fire Protection Association in Toronto.

Fire loss on farms in the United States last year, was the greatest ever experienced, he declared. From data available, it appeared that farm fire losses increased 25 per cent. during the 1930 season drought, he said. The loss for the year was estimated to be in excess of \$125,000,000.

Spontaneous heating and ignition of agricultural products constituted, he said, one of the prominent causes of farm fire loss.

Norway Would Stop Wilkins' Sub Journey

Government Considers Expedition Unnecessary Risk Of Human Life

The Norwegian Government may take active measures to prevent Captain Sir Hubert Wilkins from making his projected journey to the north pole in a submarine, it was stated in an Exchange Telegraph despatch from Oslo.

The message quoted the Oslo newspaper "Aftenbladet" as saying the government considers the expedition as an "unnecessary risk of human life." If the Wilkins expedition calls at Norway en route to the pole, the despatch said, the government plans to enforce the regulations enabling it to exercise definite control over all Arctic expeditions starting from that country.

Mechanical Eye For Airmen

New Device Can Penetrate Average Fog For Two Miles

A new mechanical eye which sees through average fog was described to the Engineers' Club, at Dayton, Ohio, by W. F. Waterndorf of the General Electric Research Laboratory.

The apparatus is designed to sit on the tail of an airplane, sight an airway light through the fog and reproduce on the aviator's dash a synthetic beacon. It has not been "up" yet, but it has done its stuff successfully through two miles of ground fog.

Lawyer (reading very rich lady's will)—And to my nephew, Percy, for his kindness in calling every week to feed my darling goldfish, I leave my darling goldfish.

KASHES VANISH QUICK

"My face was covered with itching rashes. One application of Kashes Vanish Quick and the itching cleared my skin." Mrs. G. H. Hines, Gettysburg, Pa.

Jungle Broadcast

Roar Of Wild Animals In Africa Heard By Radio In England

A lion roaring in the jungle in British East Africa was heard by British wireless listeners with short-wave receivers recently, when a broadcast from a microphone in the wilds of Kenya was relayed from Nairobi on a wavelength of 49.5 metres.

The microphone was installed at a jungle drinking pool, and although the lion's performance did not come up to expectations—he must have been stricken with microphone shyness—the calls of wild birds and the grunting of animals formed a weird chorus. It was fascinating to realize that the sounds came actually from the real jungle and not from an enclosed zoo.

Artificial worms that bear a remarkable resemblance to the genuine have been made for fishermen. They can be cut into desired length.

TORONTO, ONT.

SAYS CUT IN WHEAT ACREAGE WILL NOT HELP

Toronto, Ont.—Not reduction of wheat acreage in Western Canada but the co-operation of every industry, financial institution, and the transportation systems of the Dominion was necessary, if the present Canadian business depression and wheat crisis were to be solved to any degree, said Hon. Frank Oliver, advisory officer of the Board of Dominion Railway Commissioners, addressing the Transportation Club here.

Failure of the crop this year, he said, would only increase depression, although it would benefit the Wheat Pool, the banks and the provincial governments which had guaranteed the pool advance. The prairies, he said, must continue to be wheat producers for the time being. Through succeeding years, he declared, Canada's wheat acreage must be reduced if it was proven conclusively that the world was suffering from chronic and not acute over-production.

"Our recent great attempt at mass action in marketing has proved a colossal failure," he contended. He was convinced, he said, "that there is a fight on, that it is a world struggle and that every legitimate business interest in Canada is concerned in aiding the western farmer to hold his place and Canada's place in the wheat markets of the world so far as it is economically possible."

Gold Rush Continues

Many Claims Already Staked In Fife Lake District

Fife Lake, Sask.—The "rush" to the Poplar Creek bed, six miles southeast of here, and on towards Coronach, continues, and many claims have been staked.

According to information received, M. M. Bennett, a farmer opposite the M. Woolfin farm, two years ago sent samples of the dirt to Los Angeles to be assayed, and received a reply that there were traces of gold. E. Lafram, one of the men interested in the purchase of the Woolfin farm, is reported to have sent samples recently to Los Angeles, and to have been informed that the dirt he sent contained gold running from \$2 to \$20 a ton.

Fife Lake is almost directly south of Moose Jaw, about 90 miles, located in range two, about ten miles from the international border line.

Men familiar with the district, who have explored it, claim there are heavy deposits of iron pyrites in the formations in the hills and along the beds of the Poplar, Horse and branches of Frenchmen's creeks.

So far no gold is known to have been taken from the places where claims have been staked during the past two days.

Again Holds High Position

Humble Miner Heads General Assembly Of Church Of Scotland

Edinburgh, Scotland.—James Brown, the humble miner, who became a Labor M.P., once more was appointed Lord High Commissioner to the General Assembly of the Church of Scotland.

He and Mrs. Brown were installed again at Holyrood Palace, where they held a levee with all the pomp and dignity of royalty. Later Mr. Brown and his wife dined in semi-state with outsiders to St. Giles' Cathedral.

Accepts Office Of Premier

Saint John, N.B.—Hon. Charles D. Richards, of Fredericton, accepted the office of premier of New Brunswick at the hands of His Honor H. H. McLean, Lieutenant-Governor of the Province. This follows the resignation of Hon. J. B. M. Baxter from the premiership's office to take a place on the Supreme Court Bench of New Brunswick.

Another Loan For India

London, England.—Surprise was created in the financial district by announcement of a six per cent. loan of \$58,000,000 for the government of India. It was issued at 100, redeemable in 1933 and 1934. The last loan was received with great success.

W. N. T. 1931

System Of Credits Will Be Discussed

Premier Bennett Suggests Matter Be Referred To Banking Committee

Ottawa, Ont.—The question of setting up a system of intermediate credits for agriculture will be considered and discussed, in the light of knowledge possessed by the government respecting the \$5,000,000 revolving credit corporation, before the banking committee of the House of Commons.

Unanimous decision favoring this action followed the introduction of a proposal in the House by W. T. Lucas (U.P.A., Camrose), for "consideration" of some system of intermediate credits; and a statement by Rt. Hon. R. B. Bennett, Prime Minister, suggesting that the whole matter be referred to the banking and commerce committee.

Mr. Lucas had expressed his belief that the \$5,000,000 corporation would not take care of the situation among western farmers.

If government could not set up a system of intermediate credits for agriculture, it might co-operate with the present \$5,000,000 plan and subscribe dollar for dollar with the other subscribers.

"If the Hon. Member," the Prime Minister stated, "will move that resolution be referred to the committee on banking and commerce, I think that would serve a very useful purpose; and discussion could take place in the light of knowledge which we have as to the proposed operations of the credit organization to which I have referred the other day. The experience in the United States in connection with a similar organization was that practically only ten per cent. of the amount subscribed was used."

Stiff Sentences For Reds

Revolutionists In Indo-China Given Long Prison Terms

Paris, France.—A Havas despatch from Hanoi, French Indo-China, says long prison terms have been given Communist revolutionists following a three-day trial at which it was revealed Communist plots in Indo-China were directed from Canton.

The chief of the Saigon Communists was sentenced to life imprisonment for participation in the assassination of a native foreman of the French administration. Five others were given 20 years, seven were sentenced to 15 years and 45 from five to ten years.

An alleged plot to assassinate Governor-General Squel at Saigon was revealed during the trials.

Private Members Restricted

If Motion By Premier Bennett Is Approved

Ottawa, Ont.—Private members who had their last entire day in the House of Commons during the present session, if a motion placed on the order paper by Premier R. B. Bennett is approved.

Mr. Bennett's motion provides that on and after Monday, May 25, and all subsequent Mondays till the end of the session, government business shall take precedence. After the resolution is approved, there will remain only one hour on Tuesday evening and one hour on Friday evening, between eight and nine in each case, for consideration of private members' legislation.

Poultry Prevents Poverty

Greatly Aiding Canadian West In These Days Of Stress

Ottawa, Ont.—The humble hen is one of the greatest factors in aiding the Canadian west through these days of stress, says Fred C. Elford, Dominion Poultry Husbandman, following an official trip through to the Pacific Coast.

"It is poultry which is carrying things along," he declared. "For the farmers have the feed on hand and are turning it into new laid eggs."

Duty On Cucumbers Fixed

Ottawa, Ont.—An extra issue of the Canada Gazette gives notice that the value for duty of cucumbers has been fixed at seven cents per pound when entered under the intermediate or general tariff, such value to be computed on the weight as imported, weight of the package included.

WITH POLAR FLIGHT

Lady Grace Drummond Hay, English writer, who, it is announced, will accompany the Graf Zeppelin on its projected flight, to the North Pole, and will be the first woman in history to be a member of an expedition to the top of the world.

Will Carry On

Premier Henry, Of Ontario, To Apply Himself To Tasks On Hand

Toronto, Ont.—"I intend to carry on with the task passed to me by the former leader, who was so overwhelmingly endorsed by the people of this province 18 months ago," said Hon. George S. Henry, premier of Ontario, and successor to Hon. C. Howard Ferguson, in an interview here. "The people are desirous of forgetting elections and having their governments apply themselves as their trustees during the present trying times," he said.

Questions Must Be Answered

People Called Upon To Give Census Takers All Information

Ottawa, Ont.—All persons in Canada are called upon to answer the questions of the census-takers who will start making their rounds in June, in a royal proclamation issued in the Canada Gazette. Attention is called to the fact that the information obtained in the census can be used for statistical purposes only and not for taxation, military or jury service, or the enforcement of any law, provincial, municipal or federal.

Trans-Atlantic Flight

Sydney, N.S.—Indications that Miss Ruth Nichols may make Cape Breton at least an emergency stop on her proposed trans-Atlantic solo flight were seen today in a notification received by the Cape Breton flying club officials asking them to receive and transport to the airport three drums of special gasoline chosen by Miss Nichols for her ocean voyage.

LITTLE TRAVELLERS MADE LONG JOURNEY

Unperturbed—these three little travellers, Antoni, Helena, and Josef, aged 8, 4, and 7 respectively, who travelled unaccompanied all the way from Jugo-Slavia, posed for a press photographer upon their arrival at the Canadian Pacific Winnipeg Depot. Later they continued their journey to join their father, R. Lickza, at Coleman, Alberta.

For Transporting Opium

Hamilton Chinaman Receives Heavy Sentence When Found Guilty

Hamilton, Ont.—After hearing the crown outline its case before Judge Thomson in county criminal court here, Lee Wing, local Chinese, changed his plea from not guilty to guilty on a charge of transporting opium. He was sentenced to five years in Portsmouth penitentiary, and was fined \$1,000.

E. J. Murphy, K.C., for the crown, stated that a man named Lee Hee had been found in Regina with five large tins of opium which he confessed to securing from Lee Wong, Detective-Sergeant Zaneth, of the Royal Canadian Mounted Police, had found that shipments were being made by Wong to the Sun Sun Company, of Regina, which was Hee's concern.

British House Refuses To Legalize Lotteries

Application To Introduce Bill Defeated By Large Majority

London, England.—House of Commons came down hard on advocates of legalization of lotteries in support of hospitals, defeating by 181 to 58 an application by a Conservative member for leave to introduce a bill authorizing the operation of such lotteries.

There has been considerable agitation in favor of loosening up the laws in this respect in view of the great sums which have gone out of the country into the Irish Hospital Sweepstakes on horse races, while charitable institutions at home need money.

Figures On Butter Imports

Total For Three Months Was 2,148,494 Pounds

Ottawa, Ont.—Total imports of butter from all countries into Canada, from February 1 to April 30, 1931, were 2,148,494 pounds, stated Hon. C. H. Cahoon, secretary of state, in the House of Commons. Rates of duty collected were 8,462 pounds at 14 cents per pound; 57,176 pounds at 12 cents per pound; 398,440 pounds at eight cents per pound (less ten per cent.); and 1,683,416 pounds at one cent per pound. New Zealand butter was imported to the total of 236,440 pounds, and Australian 1,683,416 pounds.

Establishes Friendly Relations

Countess Willingdon Captures Hearts Of Women Of India

Simla, India.—Countess Willingdon, wife of the new viceroy, captured the hearts of India's women recently when she received Mahatma Gandhi's wife at the viceregal state and talked with her for more than an hour.

Mrs. Gandhi promised to send her sons of the homespun "kuddar," of which her own gown was made.

BEAUHARNOIS POWER PROBE WILL BE HELD

Ottawa, Ont.—A committee of the House of Commons will investigate the Beauharnois Power Corporation, its various subsidiaries, and its scheme for development of hydro electric energy by the construction of a canal to divert a portion of the flow of the St. Lawrence River between Lake St. Francis and Lake St. Louis, in the province of Quebec.

This outstanding development emerged recently in the course of a debate in which the whole Beauharnois development was held up as a significant scheme to secure to private interests the entire flow of the St. Lawrence River at that point for power purposes.

Allegations of fraud, misrepresentation and improper dealing, charges that members of the Dominion Senate were interested in the power scheme, and intimations that the Beauharnois Corporation had even gone so far as to attempt to corrupt members of the Quebec judiciary, featured a discussion which focussed the attention of the House.

Frequent protests, demands for rulings by the chair on points of order, objections to bringing the judiciary into Commons debate, and heated interjections were features of an impromptu debate which held the stage for practically the entire day.

During the debate Premier R. B. Bennett declared the engineers' report shows the Beauharnois Canal now under construction is larger than provided for in the order-in-council passed by the former government. In stating that the whole matter should be referred to a committee, Mr. Bennett informed the House he had been collecting information, and opinions of counsel, in detail, but he agreed with Mr. Gardiner that the canal was larger than provided for by the order.

Eight-Hour Day Debated

Matter Brought Up In House By Hon. Peter Heenan

Ottawa, Ont.—The House of Commons debated the question of establishing the eight-hour day throughout the Dominion, and once again constitutional difficulties were cited as a bar to any immediate action in this respect.

Hon. Peter Heenan, former minister of labor, and Liberal member for Kepora-Rainy River, brought the matter up. In a resolution setting forth that Canada is a signatory to the Treaty of Versailles, thereby subscribing to the principle of a maximum working day of eight hours, Mr. Heenan called upon the government to take steps to insure the fulfillment of treaty obligations relating to hours of work.

Although Hon. Hugh Guthrie, Minister of Justice, intimated that the government had no objection to the resolution passing, it was still under discussion when the House adjourned. It therefore comes into the category of private members' legislation, which has been "talked out," and will probably not be discussed again during the present session.

Plans For Conference On Unemployment

Mayor Of Winnipeg Proposes Meeting Of Manitoba Civic Officials

Winnipeg, Man.—Mayor Ralph H. Webb, of Winnipeg, has outlined a proposal for a province-wide unemployment conference. Mayors of cities and towns and Reeves of municipalities will be invited to attend the parley. Concrete proposals to aid unemployed next season would then be laid before the provincial government, Mayor Webb said. In the meantime, he intends to call a meeting of representatives of greater Winnipeg municipalities.

Titles Must Wait

Ottawa, Ont.—Rules of the House of Commons provide that only one resolution may appear on the order paper in the name of any one member. One resolution now stands in the way before the provincial government, Mayor Webb said. His resolution asking his majesty to grant titles to Canadians must wait until the present resolution is disposed of.

Stony Plain and District

THIS IS GOLF WEEK! Attention is called to the article on page one; and also to the golf illustrations and letter-press on this page, the Canadian Pacific Ry. has kindly released to the Editor for this week.

Jack McGillis has returned from a vacation spent at his home in Mountain Park, and has resumed his duties at the local station.

An official announcement from Montreal says trains 3 and 4 (Confederation Special) will not be run this summer; and no mention is made as to when trains 5 and 6 (Prince Rupert) will resume operation.

The regular weekly half holiday in the Town of Stony Plain commences Wednesday next June 3, when all places of business close at one p.m. June 3d is also a bank holiday.

Stony Plain's Senior baseballers are still waiting to hire a good manager before opening the ball season.

The new weed inspectors for Inga Municipality are: Div. 1, T. Graden; Div. 2, J. C. Ulmer.

On May 19 Rev. Jos. Mikas of Holy Rosary Parish, Edmonton, visited Gainford and Entwistle, where he conducted services for the Polish and Ukrainian people.

United Church Notes.

On Sunday last we had splendid and well attended services at all points. The subject was "The Quest for Satisfaction."

Next Sunday, May 31, the Conference will be in session at Calgary. Rev. Sander is taking charge of the service at Erskine church, Edmonton. Service at Stony Plain will be conducted by Rev. C. H. Reppert. At Spruce Grove and Holborn the services will be conducted by Capt. Gibson.

By Way of Economy

Many a battery is discarded before its time, simply for the lack of a little attention. If your battery is in good condition, we tell you so. If it needs repair, we will do the work right and at fair prices.

E. H. PIDGEON, AGENT.

Spruce Grove News.

Several of the local youths had entries in the bird-house competition held at the Beach on the holiday.

The new refreshment parlor is due to open Monday next, June 1st.

The Grove's Senior baseball team would be pleased to hear from Stony's Senior ball players, having sent the latter a challenge to a game, some time ago.

The Grove's school boys' ball team motored down to Lt. John school last week for a game. After a close contest, St. Johns came out winners by 6 runs to the Grove's 5.

Rev. C. Keenan will hold services at Gainford Sunday next, May 31.

During the absence of the regular preacher, the service at the local United church, on Sunday morning next, will be in charge of Captain E. R. Gibson.

Spruce Grove M. D. Councilors are billed to meet on Monday next, June 1.

We're all set for the event of the season next Saturday night at Carvel, when Mr. Michalo Buws, of the local staff of the Canadian National Ry., weds Miss Rosie Stecyk. This will be a double event, as Rosie's sister Annie will be united in the holy bonds of matrimony, at the same time and place, to Mr. Bill Katzkalo of the C.N.R. staff, Duffield.

Incorporation Discussed.

A get-together meeting of the residents of the proposed area to be incorporated was held last week in the Hotel parlor, with W. McLeod in the chair. Some discussion took place on a proposal said to have originated with the Municipality's councillors, that action on incorporation be delayed until the first of the year. This proposal, apparently, did not meet with the approval of the majority present.

An eleventh hour protest to the incorporation proceedings has been entered by the owner of a five-acre plot in the new limits.

Another meeting will be called, for the same place, tomorrow (Friday) evening, when it is expected that the deputy minister of municipal affairs, Mr. R. English, will be present.

The Grove's Baseballers

The Grove's ball team opened the Intermediate League season on the 24th with a game with Duffield team, on the latter's diamond. The play was nip and tuck all the way thru, between the Groves and Duffers, with Groves winning by 19 runs to 17.

Following is the line up of the Grove's team: F. Loeblich 1b, R. Graden 2b, Louie Seymour 3b, C. Brox r. f., Hy Seuger lf, H. Loeblich ss, W. Brox cf, C. Loeblich p, W. Brox c.

JOE D. MILLER, Manager

Golf Is Golf From Coast To Coast

Golf has assumed such important proportions in the make-up of modern everyday life that it constitutes a very real phase of the activities of those who serve the public. The Canadian Pacific Railway is such a one and its train services to golf courses and established arrangements for guests at its many hotels to enjoy the game are the practical interpretation of its desire to maintain the traditions of 50 years of meeting the requirements of the Canadian people.

THE PICTURES

(1) Looking from the fairway at the first tee, pavilion and Banff Springs Hotel, at Banff, Alta. The Spray River (left) forms a sportsy water-hazard. This course is a mile above nestled in the heart of the beautiful Rocky Mountains. (2) On the famous course at St. Andrews-by-the-Sea, N.S. (3) The 18th tee at the Oak Bay Golf Club, Victoria, B.C. Note the periscope to allow players a glimpse of what they have to cope with. Golf is played the year round on this course.

and their visitors. From coast to coast, excellent courses are available and where the company does not operate its own links, playing privileges at first-class clubs are granted. In the Maritimes, there are courses at St. Andrews-by-the-Sea, N.B.; Kentville, N.S.; Digby, N.S.; and Yarmouth, N.S. all in connection with the company's hotels. Quebec City has two fine courses, one club dating back to 1874.

Montreal has the oldest club in Canada, the Royal Montreal, founded in 1878, which today boasts two championship 18-hole courses. Other Clubs are numerous and good. Toronto, too has many excellent links, including the Royal York Golf Club, where guests at the Royal York Hotel have playing privileges. Ontario abounds in courses, all along the Canadian Pacific's lines. Bungalow camps at French River and Kenora (Lake of the Woods) have sportsy 9-hole courses for their patrons. Throughout the Prairie Provinces, golf is available at all the larger centres, while the Banff Springs Hotel Golf course is among the best in the country. In settings of unrivalled mountain scenery. It is the Mecca for golfers from all over Canada and the United States, to say nothing of the numerous overseas visitors who play it each summer. Vancouver and Victoria offer ready hospitality, the latter standing unique among Canadian golf centres, in that the game is played throughout the 12 months of the year, the annual mid-winter tournament for the E. W. Beatty Challenge Cup, run by the Canadian Pacific Railway, being an outstanding feature of the golf calendar.

The Census of Canada 1931

In the opening weeks of June every family and every home in Canada will be visited by a representative of the Government for the great national purpose of taking the seventh census of Canada.

The census is really a stocktaking. That is, it provides the information to enable the Government and others interested in the development of the country to formulate progressive policies for the happiness, comfort and prosperity of our people.

All the information supplied is strictly confidential, and the officers of the Government are subject to severe penalty if they disclose any of the information which is given to them by residents in the country, to any other than the Government.

Furthermore, it has nothing whatever to do with taxation, or military service, or compulsory school attendance, or immigration, or any such matter; and the government itself cannot use it except for statistical totals.

The Government representative will put the same questions to all, and it is your duty as a resident of this country to answer promptly and truthfully. The Government is very anxious to avoid forcing anyone to answer these questions, but it is empowered to do so in the few cases where individuals may refuse.

Issued by

HON. H. H. STEVENS, Minister

DEPARTMENT OF TRADE AND COMMERCE—OTTAWA

Car Catches Fire.

While Mr Schly of Edmonton was motoring home from Edmonton Beach early Tuesday morning in his little green Carole No. 64352 the latter ran out of gas, on the Jac Doern hill. A Stony resident procured a supply for him, and this was poured into the tank without using a funnel. Some of the fluid must have slopped onto the engine, for, when the latter started, so did a fire which cleaned out the interior of the car. None of the occupants was injured.

Mr Schly returned Tuesday evening and towed the remains in to the City.

Schedule of the North West Alberta Baseball League, 1931.

Wed. 27, Stony Plain at W. League
Fri. 29, Winterburn at Stony Plain

U.F.A.'s Co-operative Buying

The meeting next Saturday evening of Stony's U. F. A. Local promises to be very interesting, when President C. Propp takes the chair. Among the business matters to come up will be the proposal discussed at the last meeting of the provincial constituency's association, namely, Co-operative buying. It is understood the Pool officials at Calgary are arranging to ship in, in carload lots on order, of all the farmers' requirements; and it is probable that several carloads of binder twine will come to Stony this fall, for distribution among members from all over Stony Plain constituency.

Before the P. M.

A sitting of the Juvenile Court was held before Magistrate McCulla on Thursday last, when two young residents of the Carvel district were charged with trapping muskrats out of season, contrary to the provisions of the Game Act. One of the accused was fined the costs of the Court. The charge against the other was dismissed. Geo. J. Bryan appeared for both the accused, while the Agent of the Department of Neglected Children appeared for the Crown.

Amending the Bank Act.

According to a despatch in Edmonton Journal heavy penalties for banks which charge more than 7 per cent interest are provided in a bill introduced in the Commons by H. E. Spencer, the U. F. member from Battle River. It is an amendment to the Bank Act, and provides a penalty for violation of the clause which now prohibits banks from charging more than 7 p.c. The provision in the Act as it stands has been ignored by the banks, Mr. Spencer claims, and as there is no penalty there is no way of calling them to account. In western Canada, particularly, he says, interest charges of 8 and 9 and in some cases 10 p.c. are common.

Bright Bank Briefs

Mr Geo Liebert, of Inga district, passed thru Bright Bank the other day, returning from a fishing trip. He had had good luck with the perch, one being of record size, being 15½ inches in length.

While getting some pure bred pigs from the Summerfield farm the other day, Mr J. W. Bowser's team took fright and started to run off, grabbing the lines which were hanging over the back of the democrat. After being dragged for nearly half a mile, Mr Bowser got the horses under control. The damages included some badly bruised knees and the total loss of a new pair of overalls.

The funeral took place on Thursday last of Irene Maria Luckott, daughter of Mr and Mrs Luckott, who had passed away on May 16, aged 33 years. Rev C. J. Stone officiated and interment took place at Inga cemetery. The funeral was largely attended by friends of the family, and many beautiful floral tributes were received. She is survived by her parents and one brother, Owen.

Basketball Games.

May 21—Stony Boys defeated the League Boys 12 points to 6. Stony Girls won over Waltham League Girls by 9 points to 3. Mr. Moseley of Garden Valley was referee.

In the game on Friday, 22d, at Stony, W. League Boys 18, Comet Boys 11.

May 26—Comet Boys 29; Stony Boys 20.

The next games are: May 28—W. League v. G. Valley. May 31, Comet v. W. League. June 2d, G. Valley v. Stony. June 4, Garden Valley v. Comet.

The Departmental Exams.

In last week's SUN an error was made in stating that the high school entrance exams start Tues. June 16 and end the 24th. The corrected dates are:

Grade Eight examinations start Wed. 24th and end on the 30th.
High school exams start Tues. June 16.

Holborn Happenings.

A record crowd attended the Holborn picnic at the rifle range, on the holiday. There were games for young people; numerous contests for prizes, at the ranges; and a dance at the hall, in the evening. The list of prize winners will appear next week.

Moisture conditions have improved slightly here since the recent rains, and a large number of earlier planted fields are showing green, with promises of a good yield. Seeding is about three parts finished thru the district, and quite a few of the farmers have completed their planting. Farmers are falling back on Old Doblin this spring instead of trusting to the more expensive tractor to do the work.

Call the Officer!

Last week's Athabasca Echo prints a poem, the opening lines of which are:

"Call up Corporal Meece
Without any delay;
There is a poet running
Loose out our way."

Up to the Government.

The Government is likely to come in for severe criticism if it doesn't do something soon about these wet week ends and equally damp Wednesday afternoons—Edmonton Journal.

Railway Time Table

Going East—Every morning at 6.23.
Going West—Every midnight at 24.13.

Schedule of Mails.

From the East—Every midnight except Saturday.
From West—Mon., Wed., Friday mornings.
